Dear Miss. Parker,

Having a year of experience in the computer science field and a bachelor's degree in computer science, I am currently pursuing my master's degree at San Francisco Bay University. My name is Samantha Wilson and I am a positive, self-motivated, and innovative person who loves to learn new knowledge. I researched and found out that SFBU is providing scholarships to Master of Science in Computer Science (MSCS) program graduates.

During my time in the field, my team and I developed an application together. The application is named Green Bin, allowing users to find the nearest recycle spot so that they can recycle waste instead of throwing all trash into the general bin. This was invented to inspire and provide convenience to the community to care more about the environment.

I have been working as a software developer at The Silver Logic for a year and I believe there is more that I can learn from SFBU. I hope to continue my studies, to be inspired continuously, and to give back to the environment by putting my knowledge and skills into effective use.

In this application, I have also attached my curriculum vitae for your review. I believe that the skills I have gained through my experiences make me the perfect candidate for this scholarship. I would also be honored to be allowed an opportunity for a meeting with you to further discuss my candidacy. Please feel free to reach out to me at any time should you have any other inquiries. Thank you for your time and I look forward to hearing from you soon.

Sincerely,

Samantha Wilson
